KSPN, KFMU, WMVY, WVMP, WCNR, KPIC, WKZE, WFIV, WFHB... On tour now

Mashable takes note of Ryan Montbleau's show streams

BE SURE TO ALSO WATCH THE HYSTERICAL VIDEO FOR "YEAH MAN" ON OUR SITE THAT MASHABLE PREMIERED.

"Singer-songwriter Ryan Montbleau has been on the road performing music for much of the last decade. But since January, he and his band have been experimenting with a new format for staying in touch musically with fans.

They've been live streaming the audio of performances for free in high quality audio at RMB Live, a site they designed for this purpose. And there's no catch: you don't have to sign up or log in through Facebook.

To broadcast live, the band's keyboard player, Jason Cohen, tapped into their digital mixing console. Each night the band sets up a station transferring the files of the recording to USB sticks that anyone can purchase. Overnight, they upload the files to Dropbox, so their merchandise guy can have the set available as a 320kbps MP3 download – complete with track marks and metadata – the next day.

There are currently 94 Ryan Montbleau Band live recordings available in their online store dating back to November, 2009. Most of them are available as a name-your-price offering.

Now, with some tinkering, the band is letting anyone listen live to their gigs in real time.

The band was using one piece of OS X software, Audio Hijack, to make the live recordings and another, Nicecast, to stream them. The surprise for Cohen — as well as for Rogue Amoeba, who makes both apps — was that Nicecast would recognize the Audio Hijack feed as an audio source in real time.

"What I've done is through the one connection first sent [the audio] into Audio Hijack to make the instant lives, and then I have Nicecast look at Audio Hijack and stream the audio from there to our server," Cohen said.

"They combined two of our tools in a way we haven't seen before," Rogue Amoeba CEO Paul Kafasis told The New York Times.

The success of the streams has been modest. According to Cohen, the first few times they did it they had more than a hundred listeners. Now they draw a couple dozen each night. Many are diehard, repeat listeners who also use the built in chat client on RMB Live to interact.

Still, Cohen says it keeps them honest. "We can't just play the same set every night because people will pick up on it. It forces us to make each show a special thing."

Montbleau says this is just a part of the essential task of being available to your fans. "I think these days you have to diversify how you connect," he says. "However they want to connect with you, you have to be there for them." - Mashable, May 15 2012

Sarah Jaffe announces new dates

6/7 Norman, OK
6/9 Denver, CO
6/10 Salt Lake City, UT

6/14 Minneapolis, MN
6/15 Chicago, IL
6/16 Pontiac, MI
6/18 Boston, MA
6/20 New York, NY

NPR on Lisa Marie Presley: "Rock's Princess Finds Her Voice"

"Lisa Marie Presley is a curiosity. Famous from birth, she is rock's only real princess. Her face is a stunning combination of her parents' best features. Her marriages have been, well, unusual. Who could forget her awkward television kiss with then-husband Michael Jackson? Or the few months of wedded bliss to actor and Elvis fanatic Nicolas Cage? She has led a colorful life — one that overshadowed her music career when she started making records in 2003. But on her new album, *Storm and Grace*, she has found her voice.

With help from producer T-Bone Burnett, Lisa Marie Presley has finally settled into a comfortable groove as an artist. Gone are the oversized production values and the elevated vocal style of her prior work in favor of a more natural approach. Burnett specializes in creating atmospheric Americana; moody soundscapes driven by big, resonant bass lines. It's a unique sonic stamp, and part of his skill as a producer lies in finding projects that wear it well. It's the kind of backdrop for which Presley's voice cries out.

Ironically, Lisa Marie Presley moved to England and worked with members of Britpop groups such as Pulp and Travis for *Storm and Grace*, yet it brought her closer to her roots. It's almost impossible to hear the name Presley and not think of Elvis, and that's a burden that his only child must bear. But Lisa Marie has a tongue-and-cheek message in the form of "Sticks and Stones," aimed at anyone who would trade places with her for her famous name.

Lisa Marie Presley says she was in a disheartened state when she started writing these songs. Now in her mid-40s, she has already outlived her legendary father and experienced plenty of heartbreak, some of which she's poured into this album. But while her voice takes an occasional melancholy turn, the overall message is hopeful. *Storm and Grace* seems to have brought her back to life."

- NPR, May 15 2012

Coming Up... June 4: MC Yogi "Give Love," Chris Robinson Brotherhood "Rosalee," Matisyahu "Sunshine," The Fixx "Anyone Else" ... June 11: Chantal Claret... June 25: Kate Miller-Heidke...
